

always
looking for
the **best**
blocks

G A E T A N O S A L Z A R U L O

Passion and attention first and foremost.

Since 1995, every day, with the experience gained over the years and the trust of our clients, we are always in search of the best blocks.

This is what drives us to travel and visit the oldest quarries and basins all over Italy, to see and touch that stone which is history, life, and emotion.

From the quarry to our sawmill, those blocks become marble slabs, stones, and granites with precious details.

Raw material for our clients.

ESSESTONE
NATURAL STONE - CERAMIC - QUARTZ

The phrases of our work

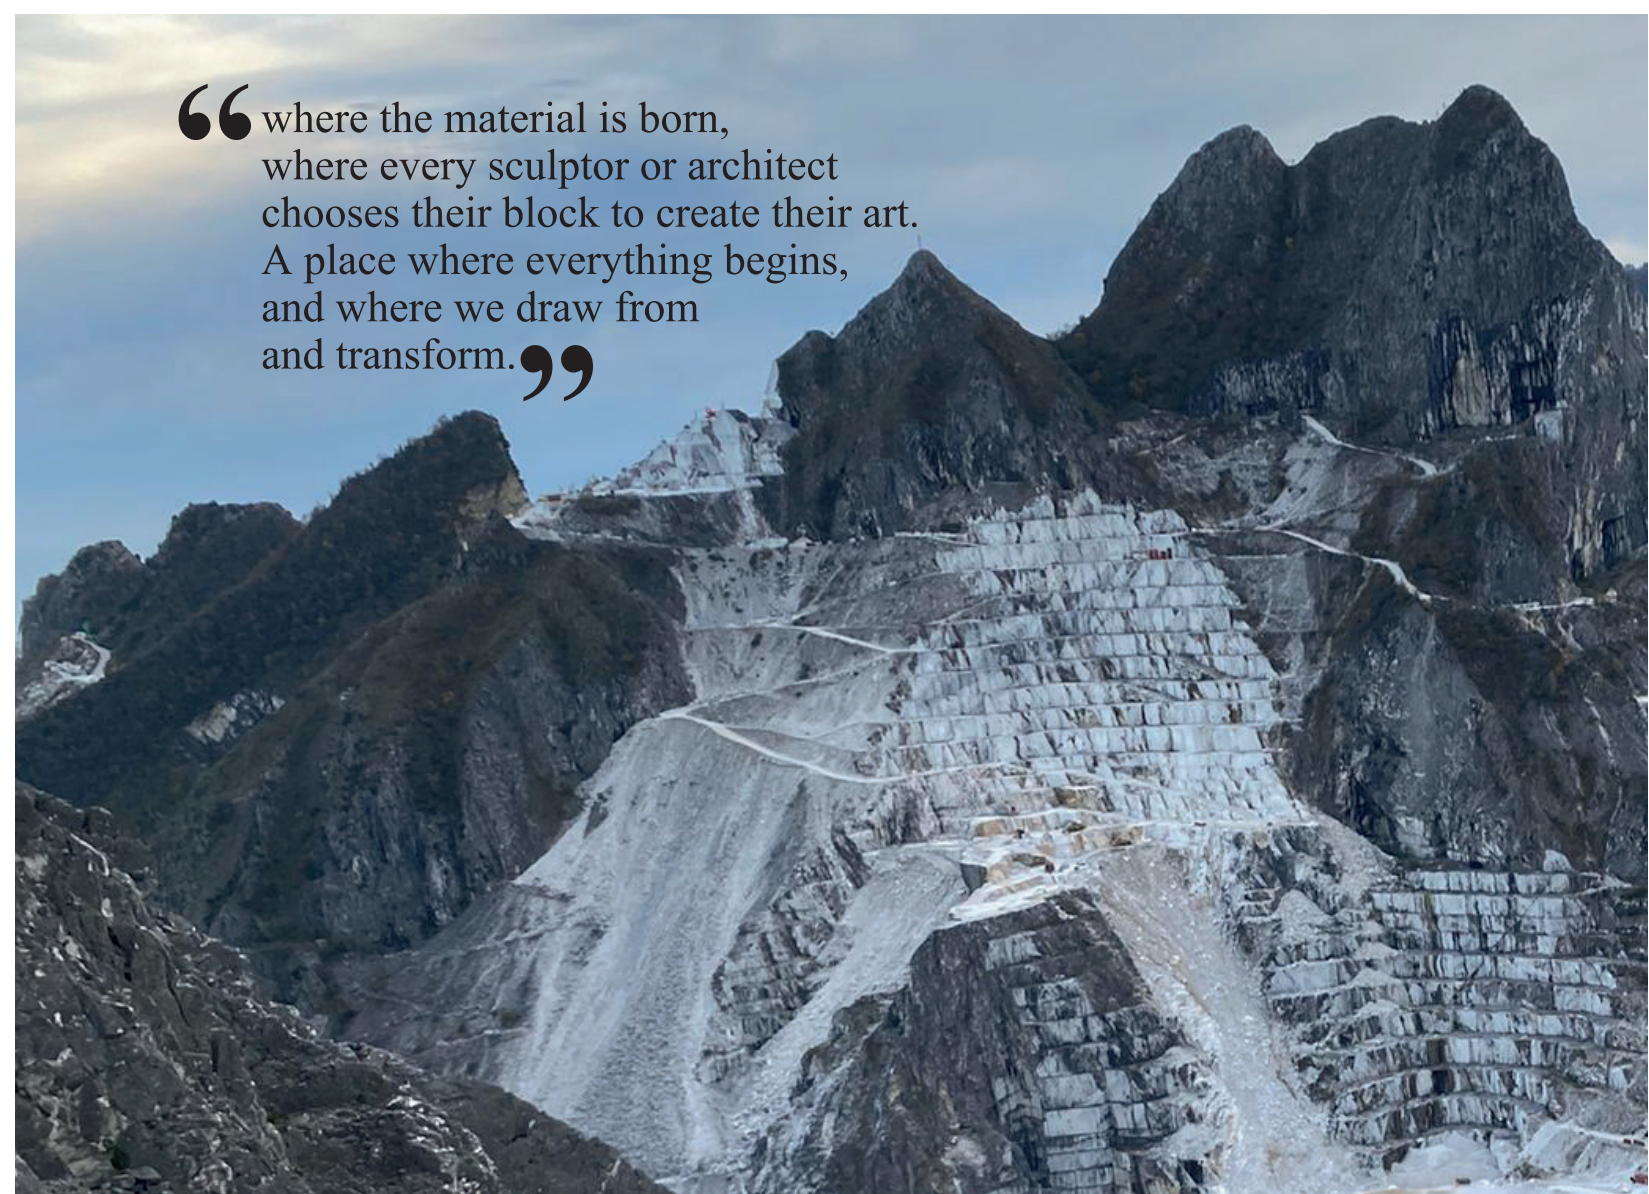

block choice

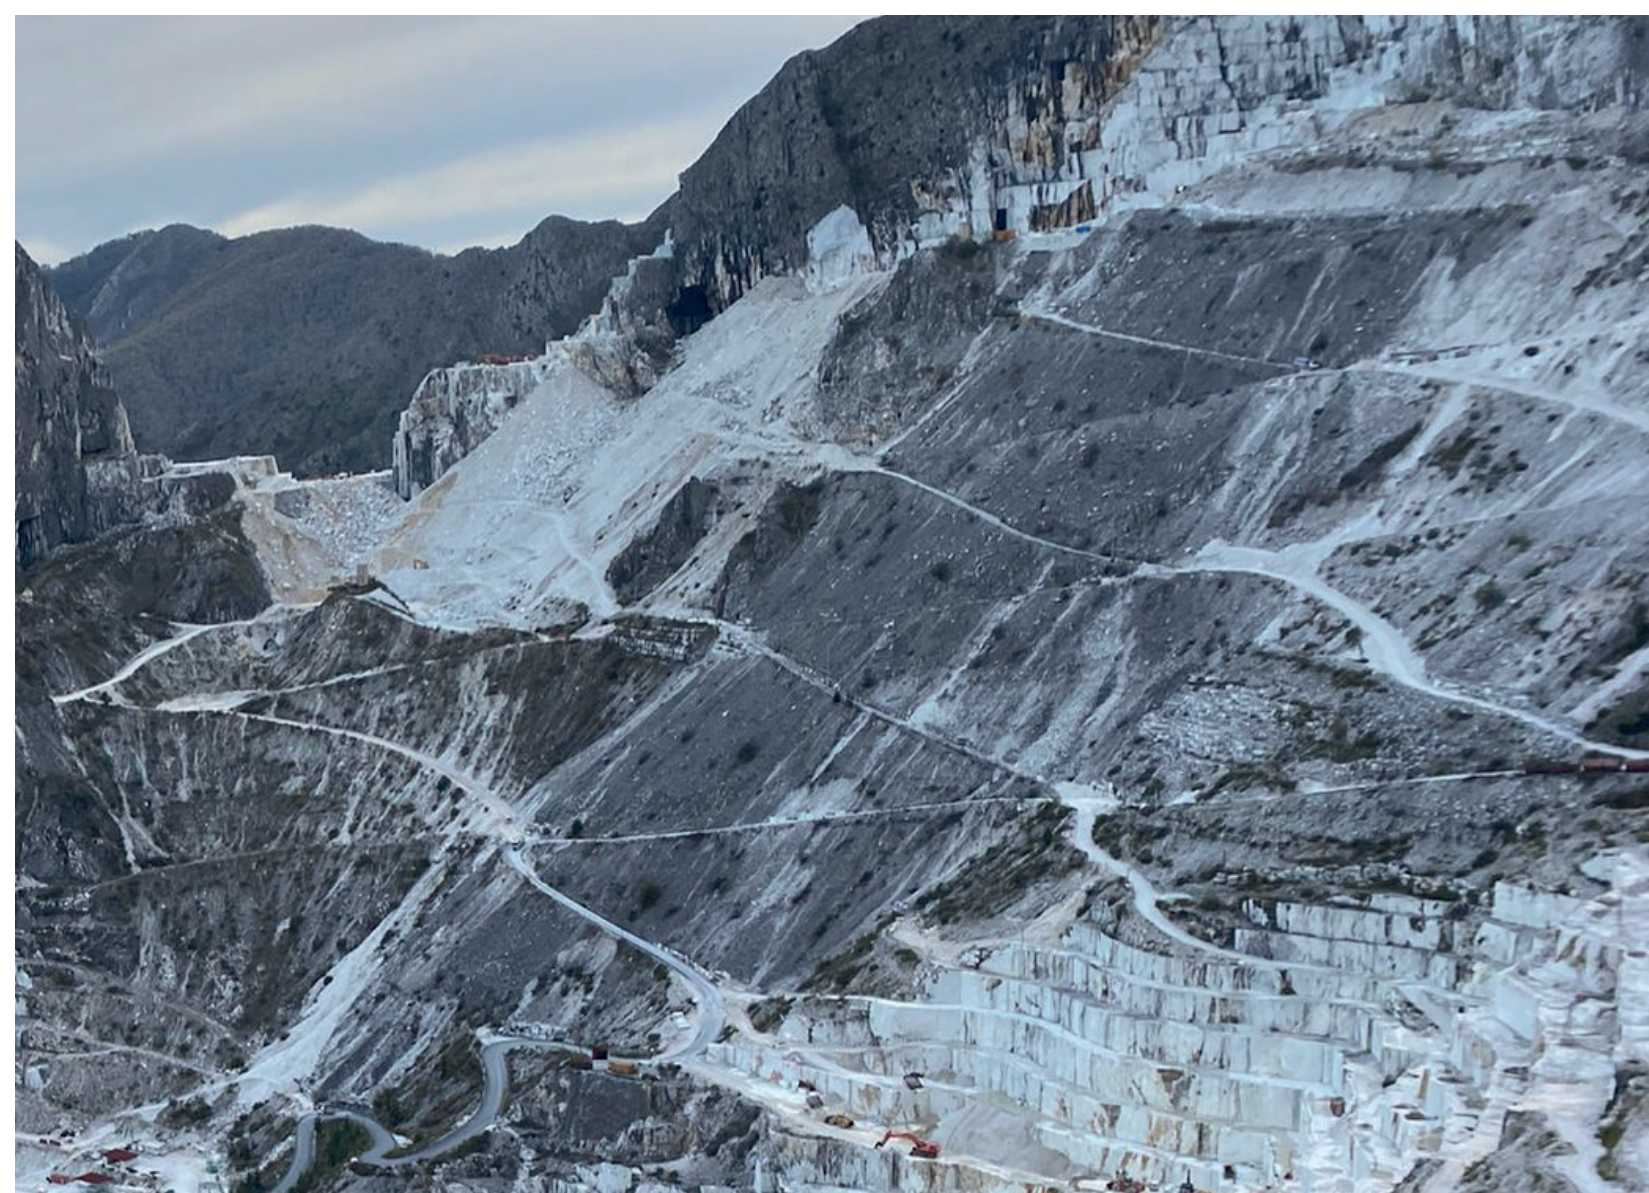

sawing

cutting

transportation

“where the material is born,
where every sculptor or architect
chooses their block to create their art.
A place where everything begins,
and where we draw from
and transform.”

Sawing

Sawing transforms the **block** into **slabs**. From each stone block, various types of slabs are created through sawing.

The Slab

Every detail makes a slab different and precious, and each slab has its specific use, to create what the mind imagines in art and beauty.

Cutting

Cutting transforms the block into flooring, cladding, and urban furniture.

From each block, with the help of our equipment, we create flooring for interiors or exteriors of any size and thickness, whether polished or bush-hammered, and road curbs with various finishes.

A vertical photograph of a marble wall. The marble has a light cream or off-white base color with prominent, dark grey or black veins running vertically. The texture appears smooth but with natural stone variations.

THE **MARBLE** INTERIORS

Marble has always fascinated the Greeks and Romans. The word, which derives from Greek, literally means "*shining stone*." Its placement is in interior design: from floors to stairs, from kitchen countertops to elegant objects.

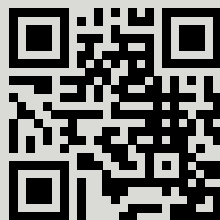

THE STONE EXTERIORS

Breccia Irpina is the oldest material from the South. Its quarries have been known since Roman times, and from them, milestone stones were obtained for the construction of the Via Appia. Its placement is in the creation of fireplaces, fountains, and flagstones. Due to its unaltered structure, it remains intact over time.

THE LAVA STONE TABLES

The *lava stone tables* made and sold by us are ceramicized and hand-decorated, and they stand out for their elegance and craftsmanship. A personalized design experience, creating the requested type of design, ranging from classic to modern.
